

DETONATION[®]

2024 CORN FIELD TRIALS

DETONATION DRY HOPPER BOX SEED TREATMENT

The new dry formulation of Detonation is a robust blend of pharmaceutical-grade biologicals, meticulously selected for all-season success. This innovative product is designed to enhance:

ROOTING • UNIFORMED GERMINATION • NUTRIENT EFFICIENCY

Formulated to be the perfect addition to any planter box, Detonation ensures increased crop establishment while maintaining nutrient and soil health benefits throughout the growing season. With its easy one-scoop application, Detonation integrates seamlessly with a talc/graphite mixture to promote optimal seeding. Leveraging the proven success of INTENSIFY for enhanced soil health, this blend offers the same benefits with pharmaceutical-grade microbes specifically chosen to meet the unique needs of corn.

DETONATION PERFORMANCE BENEFITS

- Increased Crop Yield
- Promoted Rooting and Growth
- Optimized Nutrient Availability
- Enhanced Water Infiltration
- Reduced Soil Erosion

CORN YIELD RESULTS

Plot trials have averaged an increase in yields by 8 to 12 bushels per acre.

DETONATION[®]

FROM KERNEL TO COB

Detonation delivers superior results from planting to harvest, significantly improving rooting growth and stress control throughout the growing season. By building microbial life in tired soils, Detonation not only increases yields but also offers a wide range of microbial and soil health benefits that rejuvenate soil health for years to come.
